# Haribhai V. Desai College of Arts, Science & Commerce, Pune. (Autonomous)

# **Faculty of Science and Technology**

**M.Sc. (Computer Science) Program** 

# Syllabus For F.Y M.Sc. (Computer Science)

Choice Based Credit System (CBCS) Syllabus Under National Education Policy (NEP) with effect from Academic Year 2024-25

#### Title of the Course: M.Sc. (Computer Science)

#### Preamble

The Master of Science in Computer Science (M.Sc. CS) program is designed to provide advanced education and training in the field of Computer Science. This comprehensive program aims to equip students with a profound understanding of theoretical concepts, practical skills, and cutting-edge technologies relevant to the rapidly evolving world of computing.

With a strong emphasis on academic excellence and research-driven learning, the M.Sc. CS program seeks to nurture a community of skilled Computer Science professionals capable of addressing complex challenges across various industries. By fostering a stimulating and innovative learning environment, we strive to empower our students to become leaders, innovators, and agents of positive change in the field of Computer Science.

#### Eligibility

- (a) Bachelor of Computer Science (B.C.S.) OR
- (b) B.Sc.(Computer Science) OR
- (c) B.C.A.(Science) OR
- (d) B.Sc.(Information Technology) OR
- (e) B.Sc.(Data Science) OR
- (f) B.Sc.(Cyber and Digital Science) OR
- (g) B.Sc. (Cyber Security) OR
- (h) B.Sc. (Cloud Computing) OR
- (i) Bachelor of Engineering(BE) in Computer Science/Information Technology/Electronics and Telecommunication/AI and Data Science/AI and Machine Learning/ equivalent OR
- (j) B.Voc. in Software Development/ Information Technology
- (k) B.Sc. with Computer Science as Principal Subject
- (l) General B.Sc. with Computer Science as one of the subject at TYBSc level

#### **Programme Outcomes:**

- PO 1: The Programme seeks to instill in students a deep and comprehensive knowledge of core computer science disciplines, advanced computer science concepts, theories, and principles, including algorithms, data structures, programming languages, artificial intelligence, machine learning, cloud computing, advanced databases, full stack development, software project management, and design patterns.
- PO 2: Graduates should be equipped with the ability to analyze complex problems in computer science, design innovative solutions, and implement them effectively.

#### NEP-CBCS-2024-25

#### F.Y M.Sc. (Computer Science)

- PO 3: The program aims to develop students' research skills, enabling them to evaluate existing research, contribute to knowledge in the field, and apply critical thinking to solve computational problems.
- PO 4: The program aims to cultivate a passion for research, encouraging students to engage in original research projects that contribute to the advancement of computer science knowledge and address real-world problems.
- PO 5: Students are expected to gain proficiency in multiple programming languages and develop the ability to write efficient, reliable, and maintainable code.
- PO 6: Depending on the chosen track or concentration, students may develop expertise in areas.
- PO 7: Through hands-on projects, practical assignments, and exposure to state-of-the-art tools and technologies, we aim to develop the technical proficiency and problem-solving skills necessary for success in the professional world.
- PO 8: Graduates should be adept at presenting complex technical concepts clearly and effectively, both in written and oral forms, to various audiences.
- PO 9: Computer science professionals often work in multidisciplinary teams. Students should learn to collaborate effectively with team members, understand different perspectives, and contribute productively to achieve common goals.
- PO 10: The program places a strong emphasis on ethical considerations, responsible use of technology, and awareness of the societal impact of computing solutions. We aim to produce graduates who approach their work with integrity and a sense of social responsibility.
- PO 11: Acknowledging the dynamic nature of computer science, we aim to instill in our students a desire for continuous learning and professional development, empowering them to adapt and thrive in the face of technological advancements; prepared them to adapt to new technologies and methodologies throughout their careers.
- PO 12: Students will be encouraged to think creatively and innovatively, exploring new ideas and approaches to solve computational problems and advance the state of the art in the field.
- PO 13: The program include On Job Training, internships, research work, research article and papers writing or a thesis that provides students with practical experience, applying their knowledge to real-world challenges.

The **Master of Science in Computer Science (M.Sc. CS)** program is committed to providing a rigorous and intellectually stimulating education that prepares graduates to excel in the ever- evolving field of computer science. The aim to nurture individuals who not only possess technical provess but also demonstrate leadership, ethical conduct, and a dedication to making a positive impact on society through their knowledge and expertise.

## Haribhai V. Desai College of Arts, Science and Commerce, Pune. Structure of UG Program as per NEP-2020

Name of Program: M.Sc (Computer Science)

# **SEMESTER-I**

Haribha	i V. Desai College of Arts, Science and Commerce, Pune. F.Y. M.Sc. (Computer Science) - Sem-I Course : CS-501-MJ-TH Course Title : Advanced Operating System	(Autonomous)
Teaching Scheme 04 Hours/Week	No. of Credits 04	Examination Scheme CIE : 30 Marks SEE : 70 Marks
Prerequisites:		·
Basic Comput	vledge of C programming. er Architecture concepts. ms and data structure concepts.	
Course Objectives:		
<ul><li>To understand</li><li>To provide an</li></ul>	Inced Operating Systems Concepts the programming interface to the Unix/Linux system understanding of the system calls of Operating Systems edge of the design and implementation of Operating Systems.	
Course Outcomes:		
On Completion of th	is course, student will be able to -	
• CO1: Underst	and the Operating Systems Structure with example of Unix/L	.inux.
• CO2: Learn th	ne structure of files and directory in UNIX/LINUX OS.	
• CO3: Use var	ious system calls related to file subsystem.	
• CO4: Learn th	ne process control subsystem structure in UNIX/LINUX OS	
• CO6: Learn th	us system calls related to process control subsystem. he concept of signal handling with practical implementation and the memory management policies of UNIX/LINUX OS.	
Course Contents:		
Chapter-1	Introduction to UNIX/Linux Kernel	Hours: 05
1.1 System Structure		
	JNIX Operating System	
<ul><li>1.3 Introduction to S</li><li>Overview of fi wakeup</li></ul>	system Concepts. le subsystem, processes, context of process, process states, sta	ate transitions, sleep and
Chapter-2	Unix/Linux File Subsystem	Hours: 08
2.1 Files and File Sy		
2.2 Buffer Cache		
- Buffer headers	, Structure of the buffer pool, scenarios for retrieval of a buffe	er, reading and writing

#### F.Y M.Sc. (Computer Science)

- disk blocks, advantages and disadvantages of buffer cache.
- 2.3. Internal Representation of Files
  - Inodes, Structure of regular file, Directories

- Inodes, S	tructure of regular file, Directories	
Chapter-3	System Calls for File Subsystem	Hours: 12
3.1 File I/O Sys	tem calls	
- open, read	d, write, lseek, close, creat, pipes, dup	
3.2 File Access	System calls	
- Atomic o	perations, dup2, sync, fsync, and fdatasync, fcntl, /	/dev/fd
- stat, fstat,	lstat, file types, Set-User-ID and Set-Group-ID, fi	le access permissions, ownership of
new files	and directories, access function, umask function, c	chmod and fchmod, sticky bit,
chown, fc	hown, and lchown, file size, file truncation, file sy	stems, link, unlink, remove, and
rename fu	unctions, symbolic links, symlink and readlink fund	ctions, file times, utime, mkdir and
rmdir, rea	ding directories, chdir, fchdir, and getcwd, device	special files
Chapter-4	Unix/Linux Process Control Subsystem	Hours: 12
	es and transitions	Hours: 12
4.2 Layout of s		
•	Pages and Page tables, Layout of Kernel, Uarea	
4.3 Context of a		
	context of a process	
-	and Exceptions, System Call Interface, Context S	witch
4.5 Sleep		
1	nts and addresses, Algorithms for Sleep and Wake	eup
4.6 Process crea	•	1
4.7 Process terr	nination	
4.8 Awaiting pr	rocess termination	
4.9 Invoking ot		
4.10 The user i	d of a process	
4.11 Changing	the size of the process	
4.12 System B	ook and Init Process	
Chapter-5	System Calls Process Control Subsystem	Hours: 08
	vironment System Calls	iiouis. vo
	d longjmp, getrlimit and setrlimit	
	ntrol System Calls	
- fork, vfor	k, exit, wait and waitpid, waitid, wait3 and wait, ex	xec, changing user IDs and group IDs,
	nction, user identification, process times	
- Process g		
Chapter-6	Signal Handling	Hours: 07
6.1 Introduction		
6.2 Signal Cond	-	
6.3 Signal funct		
6.4 kill and rais	e functions	

NEP-CBCS-2024-25	F.Y M.Sc. (Computer Scienc	ce)
6.5 alarm and pause	functions	
6.6 abort function		
6.7 sleep function		
Chapter-7	Memory Management	Hours: 08
7.1 Swapping		
- Allocation of s	wap space, Swapping process out, Swapping p	process in
7.2 Demand Paging		
- Data structures	for demand paging, Page stealer process, Page	e faults
<b>Reference Books:</b>		
1. Maurice J. Bach.	; The Design of the UNIX Operating System; I	PHI
2. Richard Stevens;	Advanced Programming in the UNIX Environ	nment; Addison-Wesley
3. Robert Love; Lin	ux System Programming; O"Reilly	

Haribhai V. Desai College of Arts, Science and Commerce, Pune. (Autonomous)
F.Y. M.Sc. (Computer Science) - Sem-I
Course Code : CS-502-MJ-TH
Course Title : Artificial Intelligence

Teaching Scheme	No. of Credits	Examination Scheme
04 Hours/Week	04	CIE: 30 Marks
		SEE : 70 Marks

#### **Prerequisites:**

- Data Structure and Algorithm.
- Discrete mathematics.
- Knowledge of Programming Language
- Data Analytics Skill

#### **Course Objectives:**

- To understand the concept of Artificial Intelligence (AI) in the form of various tasks.
- To understand Problem Solving using various searching strategies for AI.
- To understand multi-agent environment.
- To acquaint with the fundamentals of knowledge and reasoning.
- To understand Fundamentals of Game Theory.
- To explore of AI applications.

#### **Course Outcomes:**

On Completion of this course, student will be able to -

CO1: Understand the fundamental concepts of Artificial Intelligence.

CO2: Identify and apply appropriate search strategies for AI problem.

CO3: Identify knowledge and represent AI algorithms using various techniques.

CO4: Implement ideas to design and develop AI solutions for complex challenges.

CO5: Analyze the performance of AI models and interpret their results.

CO6: Implement ideas underlying modern logical inference systems.

CO7: Understand recent trends and future scope of AI.

#### **Course Contents:**

Chapter-1	Introduction to Artificial Intelligence	Hours: 06
1.1 Introduc	tion to Artificial Intelligence	
1.2 Foundati	ons of Artificial Intelligence	
1.3 History of	of Artificial Intelligence	
1.4 AI Risks	and Benefits	
1.5 Characte	ristics of Intelligent Agents	
1.6 Structure	e of Agents	
1.7 Agents a	nd Environments	

napter-2	Problem Solving	Hours: 10
	Solving methods	
2.2 Problem-S	Solving Agents	
2.3 Example	Problems	
2.4 Search Al	gorithms	
2.5 Blind Sea	rch Techniques: -BFS, DFS, DLS, Iterative Deep	pening, Search, Bidirectional Search,
Uniform of	cost Search.	
2.6 Heuristic	search techniques: -Generate and test,Hill Climb	bing, Best First search,
Constrain	t Satisfaction, Mean-End Analysis, A*,AO*.	
napter-3	Game Theory	Hours: 10
	Decisions in Games	I
3.2 Heuristic	Alpha–Beta Tree Search	
3.3 Monte Ca	rlo Tree Search	
3.4 Stochastic	c Games	
3.5 Partially (	Observable Games	
3.6 Limitation	ns of Game Search Algorithms	
3.7 Constrain	t Satisfaction Problems (CSP).	
napter-4	Knowledge Representation	Hours: 10
-	ations and Mappings	
	es to Knowledge Representation	
-	ge representation method	
4.4 Logical A	0	
-	ge-Based Agents	
-	opositional Logic	
	Propositional Model Checking	
4.8 Predicate	C	
4.9 Represent	ing Simple facts in Logic.	
napter-5	Reasoning	Hours: 10
	in First-Order Logic	
1	onal vs. First-Order Inference	
	n and First-Order Inference	
	Chaining, Backward Chaining	
5.5 Resolution		
5.6 Categorie	s and Objects	
5.7 Events		
	bjects and Modal Logic	
•	g Systems for Categories	
5.10Reasonin	g with Default Information	
napter-6	Planning	Hours: 08

#### NEP-CBCS-2024-25

Hours: 06

6.1 Classical Planning

6.2 Automated Planning

6.3 Algorithms for Classical Planning

- 6.4 Heuristics for Planning
- 6.5 Hierarchical Planning
- 6.6 Planning and Acting in Nondeterministic Domains Time, Schedules, and Resources
- 6.7 Analysis of Planning Approaches

#### Chapter-7 Recent trends in AI

- 7.1 Applications of AI
- 7.2 Language model
- 7.3 Information retrieval
- 7.4 Information Extraction
- 7.5 Introduction to Natural Language Processing (NLP)
- 7.6 Reinforcement Learning and Robotics
- 7.7 Computer Vision Breakthroughs
- 7.8 AI in Healthcare
- 7.9 AI in Finance Autonomous Systems.
- 7.10Introduction to Explainable AI
- 7.11Introduction to Generative AI

	F.Y. M.Sc. (Computer Science) - Sem-I Course Code : CS-503-MJ-TH	
	Course Title : Principles of Programming Lang	guage
Teaching Scheme 02 Hours/Week	No. of Credits 02	Examination Scheme CIE : 15 Marks SEE : 35 Marks
Prerequisites:		
<ul><li>Procedural La</li><li>Object-Orienta</li><li>Basic Data Str</li></ul>		
Course Objectives:		
• To understand	he various programming paradigms. the evolution of programming languages. the concepts of OO languages, functional languages, logi	ical and scripting languages
<b>Course Outcomes:</b>		
On Completion of th	is course, student will be able to – think about programmi	ing languages analytically:
CO1: Separate synta		
	ramming language designs	
CO3: Understand the	eir strengths and weaknesses	
CO4: Learn new lan	guages more quickly	
	sic language implementation techniques ograms in different programming Languages	
Course Contents:		
Chapter-1	Introduction	Hours: 02
1.1 The Art of Lan		
-	ing Language Spectrum	
• •	ogramming Languages?	
1.4 Compilation and		
1.5 Programming	Environments	
Chapter-2	Names, Scopes, Bindings, Object Orientation Concepts	Hours: 06
2.1 The Notion of		I
	e and Storage Management.	

NEP-CBCS-2024-25	F.Y M.Sc. (Computer Science)	
Rules		
2.4 Static Scoping	, Nested Subroutines, Declaration Order, Dynamic Scoping, Th	e meaning of Names
in a Scope		
2.5 Object-Oriente	0 0	
	and Inheritance, Modules, Classes, Nesting (Inner Classes), Ty nout Inheritance	pe Extensions,
2.7 Initialization an Garbage Colle	nd Finalization, Choosing a Constructor, References and Value ction	s, Execution Order,
2.8 Dynamic Meth	od Binding	
2.9 Virtual- and N	on-Virtual Methods, Abstract Classes, Member Lookup, Pol	lymorphism, Object
Closures		
2.10 Multiple Inhe	eritance, Shared Inheritance, Mix-In Inheritance	
	biguities, Replicated Inheritance	
Chapter-3	Data Types	Hours: 08
3.1 Introduction		
3.2 Primitive Data		
• •	s: Integer, Floating point, Complex, Decimal, Boolean Types, C	Character Types.
3.4 Character Strin		
3.5 Design Issues,	Strings and Their Operations, String Length Operations, Evalu	ation,
Implementation	n of Character String Types	
3.6 User defined C	Ordinal types, Enumeration types, Design Evaluation Subrange	types, Ada"s
design Evaluat	ion Implementation of user defined ordinal types.	
3.7 Array types.		
3.8 Design issues,	Arrays and indices, Subscript bindings and array categories, H	eterogeneous
arrays, Array in	nitialization, Array operations, Rectangular and Jagged arrays,	Slices, Evaluation,
Implementation	Implementation of Array Types	
3.9 Associative Ar	rays: Structure and operations, Implementing associative array	/8.
3.10 Record types	3.10 Record types: Definitions of records, References to record fields, Operations on records, Evaluation,	
implementation	n of Record types	
3.11 Union Types	: Design issues, Discriminated versus Free unions, Evaluation,	
Implementatio	n of Union types.	
3.12 Pointer and F	Reference Types :Design issues, Pointer operations, Pointer pro	blems, Dangling
	heap dynamic variables, Pointers in C and C++, Reference type	
	ion of pointer and reference types	
	on of pointers and references, Solution to dangling pointer prob	olem, Heap management
Chapter-4	Control Flow	Hours: 06
-	aluation, Precedence and Associativity, Assignments, Initializa	tion, Ordering
Within Express	sions, Short-Circuit Evaluation.	
	Unstructured Flow, Structured Alternatives to goto Sequencin	ıg.
4.3 Selection - Sho	ort-Circuited Conditions, Case/Switch Statements, Iteration.	
4.4 Iteration - Enur	meration-Controlled Loops, Combination Loops, Iterators, Log	ically Controlled
Loops Recursi	on	

4.5 Recursion - Iteration and Recursion, Applicative- and Normal-Order Evaluation

Г

Chapter-5	Subprograms and Implementing Subprograms	Hours: 08	
5.1 Introduction			
5.2 Fundamental	5.2 Fundamentals of Subprograms		
5.3 Design Issues	s for subprograms		
5.4 Local Referen	ncing Environments		
5.5 Parameter-Pa	ssing Methods		
5.6 Parameters T	hat Are Subprograms		
5.7 Overloaded S	Subprograms		
5.8 Generic Subr	outines, Generic Functions in C++, Generic Methods in Java		
5.9 Design Issues	s for Functions		
5.10 User-Define	ed Overloaded Operators Coroutines		
5.11 Implementi	5.11 Implementing Subprograms		
5.12 The General Semantics of Calls and Returns			
5.13 Implementi	5.13 Implementing "Simple" Subprograms		
5.14 Implementi	5.14 Implementing Subprograms with Stack- Dynamic Local Variables		
5.15 Nested Subprograms Blocks			
5.16 Implementi	5.16 Implementing Dynamic Scoping

5. 6.	-	gram to find whether a given file is present in c gram that a string as an argument and return all	
υ.		directory. For example $> ./a.out$ foo will return	
7.		ent directory and display the name of the files,	
8.		gram which receives file names as command li	•
		scending order according to their sizes. I) (e.g	
9.		e files from current directory which are created	
10.	Display all the	e files from current directory whose size is grea	ater that n Bytes Where n is accept

	from user.	
11.	Write a C Program that demonstrates redirection of standard output to a file.	
12.	Write a C program that will only list all subdirectories in alphabetical order from current directory.	
13.	Write a C program that redirects standard output to a file output.txt. (use of dup and open system call).	
14.	Write a C program to Identify the type (Directory, character device, Block device, Regular file, FIFO or pipe, symbolic link or socket) of given file using stat() system call.	
15.	Generate parent process to write unnamed pipe and will read from it	
16.	Handle the two-way communication between parent and child processes using pipe.	
17.	Demonstrate the use of atexit() function.	
18.	Write a C program to demonstrates the different behaviour that can be seen with automatic, global, register, static and volatile variables (Use setjmp() and longjmp() system call).	
19.	Implement the following unix/linux command (use fork, pipe and exec system call) ls –l   wc –l	
20.	Write a C program to create "n" child processes. When all "n" child processes terminates, Display total cumulative time children spent in user and kernel mode.	
21.	Write a C program to create an unnamed pipe. The child process will write following three messages to pipe and parent process display it. Message1 = "Hello World" Message2 = "Hello SPPU" Message3 = "Linux is Funny"	
22.	Write a C program to get and set the resource limits such as files, memory associated with a process	
23.	Write a program that illustrates how to execute two commands concurrently with a pipe.	
24.	Write a C program that print the exit status of a terminated child process	
25.	Write a C program that catches the ctrl-c (SIGINT) signal for the first time and display the appropriate message and exits on pressing ctrl-c again.	
26.	Write a C program which creates a child process and child process catches a signal SIGHUP,	
	SIGINT and SIGQUIT. The Parent process send a SIGHUP or SIGINT signal after every 3	
	seconds, at the end of 15 second parent send SIGQUIT signal to child and child terminates by	
	displaying message "My Papa has Killed me!!!".	
27.	Write a C program to send SIGALRM signal by child process to parent process and parent	
	process make a provision to catch the signal and display alarm is fired. (Use Kill, fork, signal and	
	sleep system call)	
28.	Write a C program that illustrates suspending and resuming processes using signals.	
29.	Write a C program which create a child process which catch a signal sighup, sight and sigquit.	
	The Parent process send a sighup or sigint signal after every 3 seconds, at the end of 30 second	
	parent send sigquit signal to child and child terminates my displaying message "My DADDY has	
	Killed me!!!".	
20		
30.	Write a C program to implement the following unix/linux command (use fork, pipe and exec system call). Your program should block the signal Ctrl-C and Ctrl- $\$ signal during the execution. i. Ls $-1   wc - l$	
31.	Write a C program which creates a child process to run linux/ unix command or any user defined	
	program. The parent process set the signal handler for death of child signal and Alarm signal. If	
	a child process does not complete its execution in 5 second then parent process kills child	
	process.

	steps how the constraints are handled. (Constraint Satisfaction Problem)	
15.	Write a computer program to play tic-tac-toe game. (Game Theory)	

Haribhai V. Desai College of Arts, Science and Commerce, Pune. (Autonomous) F.Y. M.Sc. (Computer Science) - Sem-I Course Code : CS-510-MJ-TH		
(	Course Title : Advance Databases and Web	) Technologies
Teaching Scheme 02 Hours/Week	No. of Credits 02	Examination Scheme CIE : 15 Marks SEE : 35 Marks
Prerequisite		
• Knowledge o	f file system concepts	
• A firm found	ation of any RDBMS package	
• Knowledge o	f Database Concepts	
Basic knowle	dge of HTML and CSS	
Basic knowle	dge of JavaScript.	
	p application development.	
	f what is Clint and Server-side programming.	
Objectives		
• Provides an o	verview of the concept of NoSQL technology.	
• Provides an in	nsight into the different types of NoSQL databases	5
• Makes the stu	dent capable of making a choice of what database	technologies to use, based on
their applicat	ion needs.	-
• To introduce	students to modern web technologies.	
• To introduce	students to modern web designing technologies.	
• Should gain l	knowledge about web designing using html5 and c	css3
• Student able	to use frame work	
<b>Course Outcomes</b>		
On Completion of th	is course, student will be able to -	
CO1: Students will g	et knowledge of advance database technology	
CO2: Students will b	e able to choose appropriate database technology a	as per application
CO3: Students will le	earn to design responsive web application	
CO4: Students could	design and implement scalable web application	
<b>Course Contents:</b>		
Chapter-1	Introduction to NOSQL	Hours: 05
1.1 Database Conc		
1.2 Relational Data	1	
1.3 Introduction to	the NoSQL database	
1.4 Why NoSQL		
1.5 Features of NC	SQL	
1.6 Aggregate Dat	a Models	
1.7 Distribution M	odels	
1.8 Approaches to	data distribution	

NEP-CBCS-2024-25	F.Y M.Sc. (Computer Scienc	e)
Chapter-2	NOSQL Databases	Hours: 09
2.1 Schema Mi		
2.2 Polyglot Per		
	to Key-Value Databases (Riak) Concept,	
Features, U		
	to Column Family	
	sandra) Concept, Features, Use Cases

	B Practical Assignment		
1. C	reate a Employee collection with mentioned fields		
-	oyee (eno,ename,salary,desig,dept:{deptno,deptname,lo	cation},	
- •	ct:{pname,hrs})		
	sert 10 documents in Employee collection		
3. D	splay all the documents from Employee collection		

NEP-CBCS	-2024-25 F.Y M.Sc. (Computer Science)	
	4. Display all employees whose name starts with "S"	
	5. Display all Employee with the designation "Manager"	
	6. Display all employees with salary >50000 and salary <80000	
	7. Update no. of hrs to 7 for pname=	
	8. Add bonus Rs. 5000 for all employees with salary $>$ 50000 and salary	
	<150000	
	9. Increase salary by 20% of employees working in deptname=	
	10. Remove all employees working on pname	
11-13	Neo4j Practical Assignment	
	11. Library Database :	
	i. List all people, who have issued a book ""	
	ii. Count the number of people who have read "…"	
	iii. Add a property "Number of books issued " for Mr. Joshi and set its value as the count	
	iv. List the names of publishers from pune city.	
	12. Song Database:	
	i. List the names of songs written by ":"	
	ii. List the names of record companies who have financed for the song ""	
	iii. List the names of artist performing the song ""	
	iv. Name the songs recorded by the studio ""	
	13. Library database	
	a) List all readers who have recommended either book "" or "" or ""	
	b) List the readers who haven "t recommended any book	
	c) List the authors who have written a book that has been read / issued by	
	maximum number of readers.	
	d) List the names of books recommended by "" And read by at	
	least one reader	
	e) List the names of books recommended by "" and read by	
	maximum number of readers.	
	f) List the names of publishers who haven"t published any books written by authors	
	fromPune and Mumbai.	
	g) List the names of voracious readers in our library	
14-18	Web Technology Assignment	
14 10	14. Create an HTML5 program for the following input type	
	i. Date time	
	ii. email input type	
	iii. search input type	
	<ul><li>15. Write an 5 program for student registration for college admission.</li><li>16. Write a css3 script for the above student registration form</li></ul>	
	e.g. high lite compulsory fields in a different color	
	17. Write a bootstrap program for the following	
	"The table class adds basic styling (light padding and only horizontal dividers) to a	
	table" The table can have the first name, last name, and email id as columns.	
	18. Write a bootstrap application to display thumbnails of the images

20-21	Data Structure		
	20. Write a C# program to implement a stack with push and pop operations. Find the top		
	element of the stack and check if the stack is empty or not.		
22.25	21. Write a C# program to find the top and bottom elements of a given stack.		
22-27	8		
	<ul><li>22. C# program to assign the name to the thread</li><li>23. C# program to demonstrate the concept of parameter passing for thread</li></ul>		
	24. C# program to read data from file character by character till the end of the file		
	25. C# program to compare the content of two files using StreamReader class		
	26. C# program to get the size of a specified folder including sub-folder		
	27. C# program to demonstrate the BinaryReader and BinaryWriterclasses		
28-30	Assembly:		
	28. Write a C# program which will demonstrate use of private assembly.		
	29. Write a C# program which will demonstrate use of public assembly.		
	30. Write a C# program which will demonstrate use of shared assembly.		
31-32	Exception Handling:		
	31. Write a C# program that reads a list of integers from the user. Handle the exception		
	that occurs if the user enters a value outside the range of Int32		
	32. Write a C# program that prompts the user to input a numeric integer and throws an exception if the number is less than 0 or greater than 1000.		
33-37	Windows Programming		
55-57	33. Create a windows application to perform following basic arithmetic operations		
	Calculator ×		
	0		
	7 8 9 / CE		
	4 5 6 <sup>-</sup> C		
	1 2 3 .		
	0 +		
	34. Create an application that accepts a number from a user in the textbox named num". Check		
	whether the number in the textbox num" is palindrome or not. Print the message accordingly		
	in the label control named lbldisplay when the user clicks on the button check.		
	35. Create an application which will ask the user to input his name and a message, display the		

NEP-CBCS	-2024-25 F.Y M.Sc. (Computer Science)
	two items concatenated in a label, and change the format of the label using radio buttons and
	checkboxes for selection, the user can make the label text bold, underlined or italic and
	change its color . include buttons to display the message in the label, clear the text boxes and
	label and exit.
	36. Create a user control that contains a list of colors. Add a button to the Form or testbox which
	when clicked changes the color of the Form or textbox to the color selected from the list.
	37. Create a RadioButtonList that displays the names of some flowers in two columns. Bind a
	label to the RadioButtonList so that when the user selects an option from the list and clicks
	on a button, the label displays the flower selected by the user.
38-42	Database Connectivity using ADO.Net:
	38. Write a C# application using ADO.NET to verify if the connection is established with the
	database or not. Display appropriate messages
	39. Write a C# application using ADO.NET to perform insert, delete, update and select
	operation.
	40. Create table Student with the following columns and datatypes. Student
	(rollnoInt, Name Char(20), DOB Date) Insert few records into the table.
	Change the candidate name from "Ram" to "Krishnan". Drop the table. Display
	all the records in gridview.
	41. Create table Employee with the following columns and datatypes & perform the following
	operation
	i. Display all the employees whose SAL is less than 3000.
	ii. Display all the employees who are working as MANAGER or
	ANALYST.
	iii. Select all the employees who work in department 20 and whose salary exceeds
	2000.
	iv. Select the details of employees whose name starts with "J".
	v. Update the salary of employees by 1000 for those drawing less than 2000.
	vi. Find out the average salaries of employees department wise.
	42. Create a table "students" with the below given column. Insert records in that & perform
	the following operation.
	i. Delete those students who get less than 40 marks.
	ii. Display those students name who get more than 90%
	iii. Display the name of students' whose name starts with

Haribhai V. Desai College of Arts, Science and Commerce, Pune. (Autonomous)	
F.Y. M.Sc. (Computer Science) - Sem-I	
Course : CS-531-RM-TH	
Course Title : Research Methodology	

Teaching Scheme	No. of Credits	Examination Scheme
04 Hours/Week	04	CIE : 30 Marks
		SEE : 70 Marks

#### Objectives

- Research Methodology course are designed to equip students with the necessary knowledge, skills, and understanding of various research techniques and methodologies.
- Students should be familiar with various data collection techniques, such as surveys, interviews, observations, and experiments, and understand their strengths and limitations.
- Students should be aware of ethical considerations in research, including issues related to participant consent, privacy, confidentiality, and avoiding plagiarism.
- Its aim is to enable students to conduct research effectively, critically evaluate existing research, and contribute to the advancement of knowledge in their respective fields.

## **Course Outcomes**

On Completion of this course, student will be able to -

- CO 1. Understand of the fundamental concepts of research, including the research process, research questions, hypotheses, and variables.
- CO 2. Conduct a comprehensive literature review to identify relevant studies, synthesize existing knowledge, and identify research gaps.
- CO 3. Identify research problems, formulate research questions, and design appropriate methodologies to address these problems
- CO 4. Identify and select appropriate research designs, such as experimental, observational, survey, qualitative, or mixed-methods, based on the research objectives.
- CO 5. Apply appropriate data analysis methods, including statistical techniques or qualitative analysis, to draw meaningful conclusions from research data.
- CO 6. Develop a well-structured research proposal, outlining research questions, methodology, expected outcomes, and a rationale for the study.
- CO 7. Communicate research findings effectively through written reports, presentations, and academic papers.
- CO 8. Gain an appreciation for the importance of research in contributing to the advancement of knowledge in their field of study and broader society.

## CO 9. Understand the principles of research ethics and integrity and apply them in their research. **Course Contents:**

Chapter-1	Introduction to Research Methodology	Hours: 10	
1.1 Meaning	of Research		
1.2 Objective	1.2 Objectives of Research		
1.3 Motivation in Research			
1.4 Types of	1.4 Types of Research		

<ul> <li>1.5 Research Approaches</li> <li>1.6 Significance of Research</li> <li>1.7 Researcher and Characteristics of Researcher</li> <li>1.8 Research Ethics and Integrity</li> <li>1.9 Plagiarism and types of plagiarism</li> <li>1.10 Introduction to Plagiarism check tools</li> </ul>	
<ul> <li>1.7 Researcher and Characteristics of Researcher</li> <li>1.8 Research Ethics and Integrity</li> <li>1.9 Plagiarism and types of plagiarism</li> <li>1.10 Introduction to Plagiarism check tools</li> </ul>	
<ul><li>1.8 Research Ethics and Integrity</li><li>1.9 Plagiarism and types of plagiarism</li><li>1.10 Introduction to Plagiarism check tools</li></ul>	
<ul><li>1.9 Plagiarism and types of plagiarism</li><li>1.10 Introduction to Plagiarism check tools</li></ul>	
1.10 Introduction to Plagiarism check tools	
1.10 Introduction to Plagiarism check tools	
1.11 Research Methods versus Methodology	
1.12 Research and Scientific Method	
1.13 Importance of Knowing How Research is Done	
1.14 Criteria of Good Research	
Chapter-2Literature Review and Formulation of ResearchHours: 06	
Problems	
2.1 Research Process	
2.2 Reviewing the literature: purpose of a literature review	
2.3 Literature resources	
2.4 The Internet and a literature review	
2.5 The Internet and research strategies and methods	
2.6 Conducting and Evaluating literature reviews	
2.7 Formulation of research problem	
2.7.1 What is a Research Problem?	
2.7.2 Selecting the Problem	
2.7.3 Necessity of Defining the Problem	
2.7.4 Technique Involved in Defining a Problem	
Chapter-3Research DesignHours: 08	
3.1 Meaning of Research Design	
3.2 Need for Research Design	
3.3 Features of a Good Design	
3.4 Important Concepts Relating to Research Design	
3.5 Different Research Designs/Methods	
5.5 Different Research Designs/ Methods	
3.5.1 Pure and Applied Research	
-	
3.5.1 Pure and Applied Research	
<ul><li>3.5.1 Pure and Applied Research</li><li>3.5.2 Exploratory or Formulative Research</li></ul>	
<ul><li>3.5.1 Pure and Applied Research</li><li>3.5.2 Exploratory or Formulative Research</li><li>3.5.3 Descriptive Research</li></ul>	
<ul><li>3.5.1 Pure and Applied Research</li><li>3.5.2 Exploratory or Formulative Research</li><li>3.5.3 Descriptive Research</li><li>3.5.4 Diagnostic Research</li></ul>	
<ul> <li>3.5.1 Pure and Applied Research</li> <li>3.5.2 Exploratory or Formulative Research</li> <li>3.5.3 Descriptive Research</li> <li>3.5.4 Diagnostic Research</li> <li>3.5.5 Evaluation Studies</li> </ul>	
<ul> <li>3.5.1 Pure and Applied Research</li> <li>3.5.2 Exploratory or Formulative Research</li> <li>3.5.3 Descriptive Research</li> <li>3.5.4 Diagnostic Research</li> <li>3.5.5 Evaluation Studies</li> <li>3.5.6 Action Research</li> </ul>	
<ul> <li>3.5.1 Pure and Applied Research</li> <li>3.5.2 Exploratory or Formulative Research</li> <li>3.5.3 Descriptive Research</li> <li>3.5.4 Diagnostic Research</li> <li>3.5.5 Evaluation Studies</li> <li>3.5.6 Action Research</li> <li>3.5.7 Experimental Research</li> </ul>	
<ul> <li>3.5.1 Pure and Applied Research</li> <li>3.5.2 Exploratory or Formulative Research</li> <li>3.5.3 Descriptive Research</li> <li>3.5.4 Diagnostic Research</li> <li>3.5.5 Evaluation Studies</li> <li>3.5.6 Action Research</li> <li>3.5.7 Experimental Research</li> <li>3.5.8 Analytical Study or Statistical Method</li> </ul>	
<ul> <li>3.5.1 Pure and Applied Research</li> <li>3.5.2 Exploratory or Formulative Research</li> <li>3.5.3 Descriptive Research</li> <li>3.5.4 Diagnostic Research</li> <li>3.5.5 Evaluation Studies</li> <li>3.5.6 Action Research</li> <li>3.5.7 Experimental Research</li> <li>3.5.8 Analytical Study or Statistical Method</li> <li>3.5.9 Historical Research</li> </ul>	
<ul> <li>3.5.1 Pure and Applied Research</li> <li>3.5.2 Exploratory or Formulative Research</li> <li>3.5.3 Descriptive Research</li> <li>3.5.4 Diagnostic Research</li> <li>3.5.5 Evaluation Studies</li> <li>3.5.6 Action Research</li> <li>3.5.7 Experimental Research</li> <li>3.5.8 Analytical Study or Statistical Method</li> <li>3.5.9 Historical Research</li> <li>3.5.10 Surveys</li> </ul>	
3.5.1 Pure and Applied Research3.5.2 Exploratory or Formulative Research3.5.3 Descriptive Research3.5.4 Diagnostic Research3.5.5 Evaluation Studies3.5.6 Action Research3.5.7 Experimental Research3.5.8 Analytical Study or Statistical Method3.5.9 Historical Research3.5.10 Surveys3.5.11 Case Study3.5.12 Field StudiesHours: 10	
<ul> <li>3.5.1 Pure and Applied Research</li> <li>3.5.2 Exploratory or Formulative Research</li> <li>3.5.3 Descriptive Research</li> <li>3.5.4 Diagnostic Research</li> <li>3.5.5 Evaluation Studies</li> <li>3.5.6 Action Research</li> <li>3.5.7 Experimental Research</li> <li>3.5.8 Analytical Study or Statistical Method</li> <li>3.5.9 Historical Research</li> <li>3.5.10 Surveys</li> <li>3.5.11 Case Study</li> <li>3.5.12 Field Studies</li> </ul>	

EP-CBCS-2024-25 F.1 M.Sc. (Computer Science)	
4.3 Significance of Hypothesis	
4.4 Types of Hypothesis	
4.5 Sources of Hypothesis	
4.6 Characteristics of Good Hypothesis	
4.7 What is sampling?	
4.8 Aims of Sampling	
4.9 Characteristics of Good Sample	
4.10 Basis of Sampling	
4.11 Merits and demerits of Sampling	
4.12 Sampling Techniques or Methods	
4.13 Probability Sampling Methods	
4.14 Non-Probability Sampling Methods	
4.15 Sample Design and Choice of Sampling Technique	
Chapter-5 Data Collection, Processing and Analysis of Data	Hours: 10
5.1 Collection of Primary Data	
5.2 Method of data Collections - Observation, Interview, Questionnaires an	nd Schedules
5.3 Difference between Questionnaires and Schedules	
5.4 Some Other Methods of Data Collection	
5.5 Collection of Secondary Data	
5.6 Selection of Appropriate Method for Data Collection	
5.7 Case Study Method	
5.8 Processing Operations and Some Problems in Processing	
5.9 Elements/Types of Data Analysis	
5.10 Statistics in Research	
5.11 Measures of Central Tendency, Dispersion, Asymmetry (Skewness)	
5.12 Measures of Relationship - Chi-Square, t-test, ANNOVA(f-test),Z-test	st
5.13 Simple Regression Analysis, and Multiple Correlation and Regression	n
5.14 Partial Correlation and Association in Case of Attributes	
5.15 Quantitative and Qualitative Data Analysis Tools	
Chapter-6 Interpretation and Report Writing	Hours: 08
6.1 Meaning of Interpretation, Why Interpretation?	
6.2 Technique of Interpretation	
6.3 Precaution in Interpretation	
6.4 Significance of Report Writing	
6.5 Different Steps in Writing Report	
6.6 Layout of the Research Report	
6.7 Types of Reports (Research Proposal/Synopsis, Research Paper, and	Thesis)
6.8 Oral Presentation	
6.9 Mechanics of Writing a Research Report	
6.10 Precautions for Writing Research Reports	
Chapter-7 Publication Ethics and Open Access Publishing	Hours: 08
7.1 Publication ethics: definition, introduction and importance	
7.2 Best practices/standards setting initiatives and guidelines: COPE, WA	AME, etc.
7.3 Conflicts of interest	

## F.Y M.Sc. (Computer Science)

- 7.4 Publication misconduct: definition, concept, problems that lead to unethical behaviour and vice versa, types
- 7.5 Violation of publication ethics, authorship and contributor ship
- 7.6 Identification of publication misconduct, complaints and appeals
- 7.7 Predatory publishers and journal
- 7.8 Open access publications and initiatives
- 7.9 SHERPA/RoMEO online resource to check publisher copyright & self-archiving policies
- 7.10Software tool to identify predatory publications developed by SPPU
- 7.11Journal finder/ journal suggestion tools viz. JANE, Elsevier Journal Finder, Springer Journal Suggester, etc.

7.12E-Resources for research: Google Scholar, Shodh Ganaga, Shodh Gangotri

<ul> <li>4.3 0/1 Knapsack Problem i)Merge &amp; Purge ii)Functional Method</li> </ul>	
<ul> <li>4.4 Bellman Ford Algorithm</li> </ul>	
<ul> <li>4.5.Coin changing problem</li> </ul>	
• 4.6 Travelling Salesperson problem	
• 4.7 Longest common subsequence	
• 4.8 String editing	
Chapter-5 Chapter Name: Decrease and Conquer	Hours: 06
5.1 Definition of Graph Representation of Graph	
• 5.2 By Constant - DFS and BFS	
• 5.3 Topological sorting	
• 5.4 Articulation Point and Bridge edge	
Chapter-6 Chapter Name: Backtracking	Hours: 07
• 6.1 General method	
• 6.2 Fixed Tuple vs. Variable Tuple Formulation	
• 6.3 n- Queen's problem	
• 6.4 Graph colouring problem	
• 6.5 Hamiltonian cycle	
• 6.6 Sum of subsets	
Chapter-7 Chapter Name: Branch and Bound Technique	Hours: 06
• 7.1 Introduction : Branch and bound terms like definition of live node, E-no	de, Dead node,
• Least cost (LC) search, Least cost Branch and Bound (LCBB)	
• 7.2 0/1 knapsack problem using LCBB method (fixed tuple size)	
• 7.3 Travelling Salesman problem using LCBB method (variable tuple size)	
Chapter-8 Chapter Name: Problem Classification	Hours: 03

F.Y M.Sc. (Computer Science)

NEP-CBCS-2024-25

• 8.1 The class of P, NP, NP-hard and NP -Complete

• 8.2 Relationship among P class, NP class, NP-hard and NP -Complete

## F.Y M.Sc. (Computer Science)

Chapt		Chapter Name: Introduction Mobile Technologies	Hours: 03
•		on to Mobile Computing- Features, Advantages, Disadvantage	es and Applications
•	1.2. Factors in	Developing Mobile Applications	
•	1.3. Mobile Ap	ops and Types of Mobile Apps	
•	1.4. Mobile Ap	pps Design & Development Process	
	1.5. Mobile Ope	rating System: IOS, BlackBery, Android, Windows Phone, PlamO	S, SymbianOS, PhoneGap
	etc.	r	
Chapt	ter-2	Chapter Name: Fundamentals of Android Programming	Hours: 06
•	2.1. Introduction	on to Android - Overview and Evolution of Android, Feature	s of Android,
•	2.2. Android A	rchitecture	
•	2.3. Android E	nvironment Setup Android-SDK, Eclipse, Emulators /Androi	d AVD
•		oid Application.	
•		on to Components of an Android Application	
•		and Manifest File	
•		pp / Project Folder Structure	
	2.7.7 / ////////////////////////////////		
Chapt	ter-3	Chapter Name: Android Activity, Intents, and Services	Hours: 06
•		ctivity and Android Activity life Cycle	
•	3.2. Toast in A		
•		plicit, Explicit, and Intent Filters	
		ervices and Service Life Cycle	
	3.5. Android F	•	
Chapt		Chapter Name: Android UI Layouts and Controls for GUI	Hours: 12
Chap		Design	110013. 12
•	4.1 Android V	iew, View Groups- Linear Layout, Relative Layout, Table La	vout Frame
		View, List View, Grid View	tyout, i runne
	•	I Controls – TextView, EditText, AutoCompleteTextView, E	lutton
		FoggleButton, CheckBox, RadioButton, RadioGroup, Progres	
•			sbar, Spinner,
•		atePicker, SeekBar, AlertDialog, Switch, RatingBar	
•		en Programming in Android, List and Adaptors	
•	4.4. Android S	tyles and Themes	
Chart			11
Chapt	ter-5	<b>Chapter Name:</b> Android Menus, Threads, Notification and Alarms	Hours: 08
	5.1 Creating a		
•	-	splash screen, Threads in Android,	
•		inning on UI thread (runOnUiThread),	
•		read, Handlers & Runnable, AsynTask (in detail)	
•		Ienus - Options, Context, Popup	
•		otification- Progress and Push	
•	5.6. Android A		
Chapt	ter-6	Chapter Name: Android ContentProviders, Broadcast	Hours: 08
		Receivers and Parsing	
•	-	ation of SQLite Database, Android Application Priorities	
•		ontent Providers – SQLite Programming : Open Helper and c	
•	-	a database, and insert, update, and delete operation in databa	se
•	6.3. Android B	roadcastReceivers	
•	6.4. Android P	arsing- JSON, and XML	

٦

Chapter-7	Chapter Name: Advanced Android Programming	Hours: 09
• 7.1. Accessing	g Phone Service (Call, SMS, MMS), Android Email	
• 7.2. Location-	based services	
• 7.3. Storage in	n Android-Shared Preferences, Internal and External Storage	9
•	lia in Android – Android Camera, Audio Player. Video play	
	Bluetooth, Android WiFi,	
Chapter-8	Chapter Name: Phone Gap Programming	Hours: 08
• 8.1. Why Use	Phone Gap?	
• 8.2. How Phot	ne Gap Works, designing for the Container, writing	
• 8.3. Phone Ga	p Applications, Building Phone Gap Applications,	
• 8.4. Phone Ga	p Limitations, Phone Gap Plug-Ins	
• 8.5. Hello, Wo	orld! Program

	Course Codee : CS-553-MJ-TH	
	Course Title : Software Project Management	I
Teaching Scheme 2 Hrs/Week	No. of Credits 02	Examination Scheme CIE :15 Marks SEE : 35 Marks
Prerequisites:		•
• Knowledge of	Software Engineering	
• Basic of softw	are testing concepts	
Course Objectives:		
<ul> <li>To study Require</li> <li>of Large Softwing</li> <li>To learn to set</li> </ul>	pat are required to ensure successful medium and large scale irements Elicitation, Project Management, Verification &Val pare Engineering Projects. lect and apply project management techniques for process mo pocess metrics and risk management	lidation and Management
<ul> <li>CO1: Learn the projects.</li> <li>CO2: Examination Management of CO3: Get kno</li> </ul>	<b>is course, student will be able to -</b> be skills that are required to ensure successful medium and la be Requirements Elicitation, Project Management, Verification of Large Software Engineering Projects. wledge to select and apply project management techniques fo	a &Validation and
	nation, process metrics and risk management. and the concepts, skills, tools, and techniques of software pro	ject management.
Course Contents:		
Chapter-1	Chapter Name: Introduction to Project Management	Hours: 4
1.1 What is a l	0	
	oject management?	
5 1	ases and project life cycle	
1.4 Organizati		
	f Project Manager	
	kdown Structure	
	oftware Project Management	T
Chapter-2	Chapter Name: Project Management Components	Hours: 4
5	egration Management-Project plan	
	ent and execution	
0	ntrols and CCB	
	ion management	
Chapter-3	Chapter Name:Scope, Time and Cost Management	Hours: 6
3.1 Strategic p	lanning	
	ning, definition	

NEP-CBCS-2024-25	F.Y M.Sc. (Computer Science)	
3.3 Verification	n and control	
3.4 Activity pla	anning	
3.5 Schedule d	evelopment and control	
3.6 GANTT CI	nart	
3.7 Basic cost	concept	
3.8 Cost estin	nation and Control	
3.9 COCOMO	model	
3.10 BASIC C	OCOMO NUMERICALS	
Chapter-4	Chapter Name: Quality Management and Quality Standards	Hours: 4
4.1 Quality pla	nning and assurance	
4.2 CMM level		
4.3 KPA"s		
4.4 PSP/TSP		
4.5 Six Sigma		
Chapter-5	Chapter Name: Human Resource Management and	Hours: 4
1	Communication Management	
5.1 Staff acqui		
5.2 Information		
5.3 Reporting		
Chapter-6	Chapter Name: Risk and Procurement Management	Hours: 4
6.1 Risk identi	fication	
6.2 Quantifica	tion and control	
6.3 Contract ac	ministration	
Chapter-7	Chapter Name: Stakeholder Management and Software	Hours: 4
	Metrics	
7.1 Identifying Stakeh		
	g and Monitoring Stakeholder Engagement	
7.3 The scope of softw		
7.4 Size- oriented metr	108	
7.5 Function oriented		
7.6 Software metrics of	lata collection

		to be sorted. The elements can be read from a file of
	e generated using the random number gen	
		Q4

- 4. Write a program in C/C++/ Java to implement Strassen's Matrix multiplication
- 5. Write a program in C/C++/ Java to find Minimum Cost Spanning Tree of a given undirected graph using Kruskal"s algorithm

- **6.** Write a program in C/C++/ Java to find Minimum Cost Spanning Tree of a given undirected graph using Prim<sup>\*</sup>s algorithm
- 7. Write a program in C/C++/ Java to from a given vertex in a weighted connected graph, find shortest paths to other vertices using Dijikstra's algorithm
- 8. Write a program in C/C++/ Java to implement Knapsack problems using Greedy method
- **9.** Write a program in C/C++/ Java to implement optimal binary search tree and also calculate the best case and worst case complexity.
- **10.** Write a program in C/C++/ Java to implement huffman Code using greedy methods and also calculate the best case and worst case complexity.
- **11.** Write a program in C/C++/ Java to find Minimum number of multiplications in Matrix Chain Multiplication
- **12.** Write a Program in C/C++/Java to find only length of Longest Common Subsequence.
- **13.** Write programs in C/C++/ Java to implement DFS and BFS. Compare the time complexity
- **14.** Write a program in C/C++/ Java for finding Topological sorting for Directed Acyclic Graph (DAG)
- **15.** Write a program in C/C++/ Java to determine if a given graph is a Hamiltonian cycle or not
- **16.** Write a Java Program in C/C++/ Java to implement Traveling Salesman Problem using nearest neighbor algorithm
- 17. Write a program in C/C++/ Java a to implement Graph Coloring Algorithm
- 18. Write a program in C/C++/ Java to implement Sum of Subset by Backtracking
- 19. Write a program in C/C++/ Java to solve N Queens Problem using Backtracking
- 20. Write a program in C/C++/ Java to solve 4 Queens Problem using Backtracking
- **21.** Write a program in C/C++/ Java to find out longest common subsequence from the given strings
- **22.** Write a program in C/C++/ Java to find out solution for travelling salesman problem using LCBB from a given matrix.
- 23. Write a program in C/C++/ Java to find out solution for 0/1 knapsack problem

display s	tudent information in second view and	also search the particular student information.		

**12.** Write an application to accept two numbers from the user, and displays them, but

٦

## F.Y M.Sc. (Computer Science)

reject input if both numbers are greater than 10 and asks for two new numbers.

- **13.** Create table Customer (id, name, address, phno). Create Application for Performing the following operation on the table. (using sqlite database) i) Insert New Customer Details. ii) Show All the Customer Details
- 14. Create an application that allows the user to enter a number in the textbox named "getnum". Check whether the number in the textbox "getnum" is palindrome or not. Print the message accordingly in the label control named lbldisplay when the user clicks on the button "check".
- **15.** Create Following Table: Emp (emp\_no,emp\_name,address,phone,salary) Dept (dept\_no,dept\_name,location) Emp-Dept is related with one-many relationship. Create application for performing the following Operation on the table 1) Add Records into Emp and Dept table. 2) Accept Department name from User and delete employee information which belongs to that department.
- 16. Java Andorid Program to Perform all arithmetic Operations using Calculators
- 17. Java Android Program to Change the Image Displayed on the Screen
- 18. Java Android Program to Demonstrate Alert Dialog Box
- 19. Java Android Program to Demonstrate the Menu Application
- **20.** Java Android Program to Demonstrate List View Activity with all operations (Insert, delete, Search).
- 21. Java Android Program to Display SMS from the Phone Numbers, which are in Your Contacts
- 22. Java Android Program to send email with attachment.
- **23.** Create an Android application which will ask the user to input his name and a message, display the two items concatenated in a label, and change the format of the label using radio buttons and check boxes for selection, the user can make the label text bold, underlined or italic and change its color .include buttons to display the message in the label, clear the text boxes and label and then exit.
- **24.** Write a program to search a specific location on Google Map.
- **25.** Write a program to perform Zoom In, Zoom Out operation and display Satellite view, Terrain view of current location on Google Map.
- 26. Create Simple PhoneGap Application to show "Hello World" Message.

Assign	Name of Practic	al Assignment	
No.		C	
1	validate Student f	irst and last name as it should not co	tration details and write a JavaScript to ontain other than alphabets and age should be
•	between 18 to 50		
2			gistration details and write a JavaScript to
2		ining Date, and Salary.	et to analidate anna il ID ancie a Da andan
3	Expression.	form for Login and write a JavaScri	pt to validate email ID using Regular
4	L	hy using ng-click Directive to displa	y an alert message after clicking the element
5	Write an Angular		s using ng-init, ng-model & ng-bind. And also
6	•	<u> </u>	e format (using ng-repeat directive use Array
7	ng-view)		ntent of all subjects of MSC(CS) Sem II (use
8	address and make	validation. Name should contain ch	•
0	contain only one	@, . Symbol	should contain only 6 digit, email id should
9 10		create a SPA for Login System.	he Student Degistration details and validate
10	Student first and	ast name as it should not contain oth	he Student Registration details and validate her than alphabets and age should be between current time using ng-show (e.g. Good
		fternoon, etc.)(Use AJAX).	
11	-		Date and Time of the System(Use Interval

## F.Y M.Sc. (Computer Science)

- Using angular is create a SPA to carry out validation for a username entered in a textbox. If the 12 textbox is blank, alert "Enter username". If the number of characters is less than three, alert " Username is too short". If value entered is appropriate the print "Valid username" and password should be minimum 8 characters 13 Create an angular JS Application that shows the location of the current web page. 14 Create a Node.js file that will convert the output "Hello World!" into upper-case letters Using node is create a web page to read two file names from user and append contents of first file 15 into second file 16 Create a Node.js file that opens the requested file and returns the content to the client If anything goes wrong, throw a 404 error Create a Node.js file that writes an HTML form, with an upload field 17 18 Create a Node.js file that demonstrate create database and table in MySQL 19 Create a node.js file that Select all records from the "customers" table, and display the result object on console 20 Create a node.js file that Insert Multiple Records in "student" table, and display the result object on console 21 Create a node.js file that Select all records from the "customers" table, and delete the specified record. 22 Create a Simple Web Server using node is 23 Using node is create a User Login System 24 Using node is create a eLearning System
  - 25 Using node js create a Recipe Book
  - 26 Write node is script to interact with the file system, and serve a web page from a File
  - 27 Write node js script to build Your Own Node.js Module. Use require ("http") module is a built-in Node module that invokes the functionality of the HTTP library to create a local server. Also use the export statement to make functions in your module available externally. Create a new text file to contain the functions in your module called, "modules.js" and add this function to return today"s date and time.
- 28 Create a js file named main.js for event-driven application. There should be a main loop that listens for events, and then triggers a callback function when one of those events is detected.
- 29 Write node js application that transfer a file as an attachment on web and enables browser to prompt the user to download file using express js.

	Course Codee : CS-562-MJ-TH	
	Course Title : Web Services	I
Teaching Scheme 2 Hrs/Week	No. of Credits 02	Examination Scheme CIE : 15 Marks SEE : 35 Marks
Prerequisites:		
<ul> <li>Strong knowled</li> </ul>	ge about Java programming.	
Good Understa	nding of Object Oriented Programming concepts.	
• Must be familia	ar with XML	
Course Objectives:		
	the details of web services technologies like WSDL,UDI	DI, SOAP
	implement and deploy web service client and server	,
	roperability between different frameworks	
	the concept of RESTful system	
Course Outcomes:	the concept of KLS find system	
	course, student will be able to -	
*		
	nd the web services and SOA	
	nd Web Services Architecture.	
	nd the working of SOAP and developing SOAP Web Ser	-
-	quainted with the details of web services technologies lil	ke WSDL, UDDI.
	stand the concept of RESTful services.	
Course Contents:		
Chapter-1	Introduction to Web Services	Hours: 05
1.1 Introduction		
1.2 Need and definition	n of web services	
1.3 Evolution and Eme	rgence of Web Services	
1.4 Basic operational m	nodel of web services	
1.5 Tools and technolog	gies enabling web services	
1.6 The Service Oriente		
1.7 Use of web services	s in cloud	
1.8 Benefits and challes	nges of using web services.	
Chapter-2	Web Services Architecture	Hours: 04
	tecture and its characteristics	
2.2 Core building block	cs of web services	
-	nologies available for implementing web services	
	ementing web services.	
Chapter-3	SOAP: Simple Object Access Protocol	Hours: 05
1	ommunication and wire protocols	
3.2 SOAP as a messagi		
0	P message with example	
3 4 SOAP communicat		
	h Services	
3.5 Building SOAP We		
<ul><li>3.4 SOAP communicat</li><li>3.5 Building SOAP We</li><li>3.6 Developing SOAP</li><li>3.7 Error handling in S</li></ul>	Web Services using Java	

## F.Y M.Sc. (Computer Science)

## F.Y M.Sc. (Computer Science)

- 8 Create an application of online test/quiz using MVC
- 9 Book Restaurant Table service using MVC
- **10** Design Crystal report on Employee's joining\_date, Gender, designation.

F.Y. M.Sc. (Computer Science) - Sem-I I Course Codee : CS-581-OJT Course Title : On job Training (Internship)						
Teaching Scheme 120 Hrs	No. of Credits 04	Examination Scheme CIE : 30 Marks SEE : 70 Marks				
Course Objectives						
• To provide tasks	tudents with practical, hands-on-experience in applying theo	retical knowledge to real-world				
industry	ents develop and enhance their skills, problem solving abiliti	es and work culture of the				
	ective teamwork and collaboration skills					
	e students to build and expand their professional network by nentors in industry	interactive with experienced				
<b>Course Outcomes</b>						
-	is course, student will be able to -					
	ce the knowledge related to various tools and technologies us	•				
-	ve the ability to solve complex problems independently and c	•				
• CO3: Effectively utilize critical thinking and analytical skills in tackling real world challenges						
	vely communicate and collaborate skills through interaction					
	experience in working on projects or related working within	•				
	op the ability to document process, design, implementation a	nd testing				
• CO7: Famil	ar with specific industry domain relevant to internship					
CO8: Comp	ete projects and tasks as per the predetermined objectives					
<b>Course Contents:</b>						
Sr. No. Guide	ines for On Job Training (OJT)					
	udent must start the OJT/Internship immediately in semester-II.					
	ident are expected to complete the IT related work/project within 120 hours assigned by					
-	ation (company/ industry/ consultancy/ institution)					
	nternship work may involve the IT related assignment(s) OR the maintenance of existing					
1 5	OR the design/development of new project OR equivalent w					
4 College will assign the mentors/guides for students to mo						
organi	s have to submit the weekly progress report duly signed by t ation to the assigned mentor					
6 At the format	and of OJT, students should prepare the documentation and s	ubmit a report in prescribed				
7 After c panel.	ompletion, the final presentation and documentation will be e	evaluated by the examination				

## The Poona Gujarati Kelvani Mandal's Haribhai V. Desai College of Arts, Science and Commerce, Pune

#### (Autonomous)

**Program Name: - M.Sc. Computer Science** 

#### **Eligibility:**

- (a) Bachelor of Computer Science (B.C.S.) OR
- (b) B.Sc.(Computer Science) OR
- (c) B.C.A.(Science) OR
- (d) B.Sc.(Information Technology) OR
- (e) B.Sc.(Data Science) OR
- (f) B.Sc.(Cyber and Digital Science) OR
- (g) B.Sc. (Cyber Security) OR
- (h) B.Sc. (Cloud Computing) OR
- (i) Bachelor of Engineering(BE) in Computer Science/Information Technology/Electronics and Telecommunication/AI and Data Science/AI and Machine Learning/ equivalent OR
- (j) B.Voc. in Software Development/ Information Technology
- (k) B.Sc. with Computer Science as Principal Subject
- (1) General B.Sc. with Computer Science as one of the subject at TYBSc level

#### **Objectives:**

The objective of an M.Sc. in Computer Science is to provide advanced knowledge in computing, algorithms, and software development. It equips students with problem-solving and research skills to tackle complex technological challenges. The course emphasizes practical applications, innovation, and emerging technologies like AI, Machine Learning, Android Programming etc. Graduates are prepared for careers in academia, industry, and research.

## Workload

- 1. Each theory credit is equivalent to 15 clock hours of teaching (i.e. for 2 Credits 30 Clock Hours) and each practical credit is equivalent to 30 clock hours (i.e. for 2 Credits 60 Clock Hours) of teaching in a semester.
- 2. There is 15 weeks of teacher-student interaction during the semester.
- 3. The 15 week is divided into 12 weeks teaching and 3 weeks for continuous assessment including preparation time to students during the semester.
- 4. The workload will be calculated based on 12 weeks teaching only.
- 5. For the purpose of computation of work-load the following mechanism may be adopted as per UGC guidelines.
- 6. Workload as per credit is as follows:
  - i. 1 Credit = 1 Theory period of one hour duration per week.
  - ii. 1 Credit = 1 Tutorial period of one hour duration per week.
  - iii. 1 Credit = 1 Practical period of two-hour duration per week.
- 7. Each theory Lecture time for FY, SY is of 60 min.
- 8. Each practical session time for FY, SY is of 4 hour i.e. 240 min.

Level	Seme	Credit Related to Major		Research Interns	Internship	ip Research	Total
	ster	Major Core	Major	Methodology	On Job	Project	
			Elective	( <b>RM</b> )	Training		
					(OJT)		
6.0	Ι	10 (T) + 4 (P)	2 (T) +	4			22
			2(T/P)				
	II	10 (T) + 4 (P)	2 (T) +		4 (OJT)		22
			2(T/P)				
Exit	Exit Option :- Award PG diploma on Completion of 44 Credit OR Continue with PG Second Year						cond Year
6.5	III	10 (T) + 4 (P)	2 (T) +	0	0	4	22
			2(T/P)				
	IV	8 (T) + 4 (P)	2 (T) +	0	0	6	22
			2(T/P)				
Total		54	16	4	4	10	88
2 years	2 years – 4 Semester :- Award of PG Degree on completion of 88 Credit after Three years UG Degree						
	or 1 Year -2 Semester after Four year UG Degree.

- 70. Mastering TypeScript Fourth Edition by Nathan Rozentals
- 71. Angular Development with TypeScript by Yakov Fain, Anton Moiseev
- 72. Express in Action by Evan Hahn
- 73. Node.js in Action by Mike Cantelon, Marc Harter, T.J. Holowaychuk, and Nathan Rajlich

## **Examination Pattern**

1. Exam pattern is 70-30 i.e. Semester End Examination (SEE) is of 70 % and Continuous Internal Assessment is of 30 %.

Theory, Practical/Project: -

Continuous Internal Assessment (CIA): 30 % [15 Marks / 30 Marks]

- 1. Internal Test- 20 Marks
- 2. End Sem 20 Marks
- 3. Assignment : -20 Marks

Semester End Examination (SEE): - 70 % [35 Marks / 70 Marks]

## **Paper Pattern**

SEE Paper Pattern (for 70 Marks)

Note:-

1) Question 1 is compulsory

2) Solve any five from Q2 to Q7

3) Q2 to Q7 Carry equal marks

Q.1 Solve any five of following (2 \*5 =10 Marks)

- a)
- b)
- c)
- d)
- e)
- f)

g)

**Q.2 Solve Following** 

- a) 4 Marks +3 Marks
- b) 5 Marks
- Q.3 Solve Following
  - a) 4 Marks +3 Marks
  - b) 5 Marks

**Q.4 Solve Following** 

- a) 4 Marks +3 Marks
- b) 5 Marks
- Q.5 Solve Following

- a) 4 Marks +3 Marks
- b) 5 Marks
- **Q.6 Solve Following** 
  - a) 4 Marks +3 Marks
  - b) 5 Marks
- Q.7 Solve Following
  - a) 4 Marks +3 Marks
  - b) 5 Marks

Note :- Subject teachers can make necessary changes if required.

## **Completion of Degree**

## Award of Degree:

CGPA will be calculated for students who completed 88 credits, grades are given as per the following table.

Sr. No.	Grade Letter	Grade Point	Marks
1.	O (Outstanding)	10	90<= Marks <= 100
2.	A+ (Excellent)	9	75<= Marks <= 89
3.	A (Very Good)	8	60<= Marks <= 74
4.	B+ (Good)	7	55<= Marks <= 59
5.	B (Above Average)	6	50<= Marks <= 54
6.	C (Average)	5	45<= Marks <= 49
7.	D (Pass)	4	40<= Marks <= 40
8.	F (Fail)	0	Marks <40
9.	AB (Absent)	0	-
